

ROHAN RAMPERSAD

Full-Stack Developer | AI, Automation & Database-Driven Web Applications

Princes Town, Trinidad and Tobago | +1 (868) 2844-520 | rohanrampersad383@gmail.com

Portfolio: <https://rohanrampersad383-beep.github.io/rohanrampersad.github.io/> | GitHub: <https://github.com/rohanrampersad383-beep> | LinkedIn: [linkedin.com/in/rohan-rampersad-a18ab1401](https://www.linkedin.com/in/rohan-rampersad-a18ab1401)

PROFESSIONAL SUMMARY

Applied Computer Science student and junior full-stack developer focused on building practical web applications, automation workflows, and database-backed systems. Hands-on experience with Next.js, TypeScript, PHP, Python, MySQL, PostgreSQL, Prisma, Tailwind CSS, and AI/machine learning coursework. Strong background in responsive UI design, authentication workflows, data handling, Excel-based reporting, system analysis, and project documentation. Currently targeting remote-friendly junior roles in software development, IT, automation, data operations, and technical support where strong learning speed, reliability, and practical project experience matter.

PROJECT FOCUS	DATABASES	REMOTE VALUE	REGION
Full-stack apps + AI automation	MySQL + PostgreSQL + Prisma	Self-driven builder + clear docs	Trinidad & Tobago / Remote

TECHNICAL SKILLS

Languages	HTML, CSS, JavaScript, TypeScript, PHP, Python, SQL, MATLAB
Frameworks / Libraries	Next.js, Tailwind CSS, Prisma ORM, Node.js fundamentals
Databases / Backend	MySQL, PostgreSQL, CRUD operations, schema design, ERDs, normalization, prepared statements
Tools / Platforms	Git, GitHub, VS Code, WAMPServer, phpMyAdmin, Jupyter Notebook, Microsoft Excel, Word, PowerPoint, AWS foundations
Concepts	REST-style APIs, authentication, responsive design, dashboard UI, data preprocessing, model evaluation, OOAD, Waterfall SDLC

TECHNICAL PROJECTS

Job Match Assistant | Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL

- Built a full-stack job discovery and tracking platform with resume upload/parsing, career preferences, dashboard views, review queues, and manual application tracking.
- Implemented approved public job-source ingestion, deduplication logic, location normalization, remote-role support, scoring explanations, and high-match filtering.
- Designed PostgreSQL data models with Prisma ORM and improved the interface with modern cards, filters, responsive layouts, and recruiter-friendly source metadata.
- Maintained compliant workflows by avoiding scraping/auto-apply behavior and focusing on legal job discovery, user review, and application organization.

Fitness Central - Final Year Web Application | HTML, CSS, JavaScript, PHP, MySQL

- Developed a browser-based fitness tracking system with user registration/login, workout logging, weight records, goal setting, dashboard progress, and an exercise guide.
- Integrated PHP and MySQL using structured CRUD workflows, session handling, hashed passwords, prepared statements, and relational database tables.
- Produced supporting software engineering documentation including Waterfall SDLC stages, use case diagrams, sequence diagrams, state transition diagrams, ERD work, test plans, and evaluation.

AI / Machine Learning Coursework | Python, Jupyter Notebook, Machine Learning

- Completed practical notebooks involving data preprocessing, feature extraction, classification, model training, evaluation metrics, confusion matrices, and visual outputs.
- Worked across tabular, image, audio, and text-based tasks, strengthening understanding of model workflows and applied AI problem solving.

Image Processing - Leaf Morphometric Analysis | MATLAB

- Applied RGB/HSV thresholding, binary masking, morphological processing, segmentation, boundary detection, centroid/medoid analysis, RGB histograms, and Green Leaf Index ranking.

ADDITIONAL SYSTEMS & DATABASE PROJECTS

Database and Systems Design Portfolio | MySQL, SQL, ERDs, DFDs, Data Dictionaries

- Completed systems and database projects including Velocity Motors, Toyota, and Mandy's Hardware, covering ER modelling, normalization, SQL scripts, data dictionaries, query design, interface planning, and system evaluation.

- Practiced converting business requirements into structured entities, relationships, tables, forms, reports, and testable database-backed workflows.

GITHUB / PORTFOLIO HIGHLIGHTS

- Public GitHub includes repositories for a personal IT portfolio, Fitness Central, and AI Job Match Assistant, showing web development, PHP/MySQL, TypeScript, Next.js, PostgreSQL, AI/ML, and cloud-related practice.
- Portfolio presents academic projects, technical skills, coursework evidence, and developer-focused project summaries for recruiters to review quickly.
- Currently improving repositories with stronger READMEs, screenshots, setup instructions, deployment details, and cleaner project documentation for remote hiring visibility.

PROFESSIONAL EXPERIENCE

Accounts Clerk - Persads Supercenter Jun 2024 - Jan 2025

- Managed financial records and daily data entry using Microsoft Excel, supporting sales, payroll, income reports, and cash flow tracking.
- Performed daily balancing and transaction checks to maintain accuracy, consistency, and dependable reporting across financial records.
- Adapted quickly to unfamiliar processes, became trusted with independent responsibilities, and supported coworkers beyond scheduled duties when needed.
- Built transferable strengths in data accuracy, confidentiality, reporting discipline, organization, and problem solving under pressure.

Cashier / Inventory Assistant - Mandy Sooklal Hardware Jun 2022 - Sep 2022

- Processed customer transactions accurately while supporting stock updates, restocking, and basic inventory monitoring.
- Developed communication, customer service, teamwork, and operational organization skills in a busy retail environment.

EDUCATION

- BSc (Hons) Applied Computer Science** | Anglia Ruskin University (ARU), delivered through SAMS, Trinidad and Tobago | **Expected Apr 2026**
- NCC Education Level 5 Diploma in Computing / Computer Business** | School of Accounting and Management Studies (SAMS), Trinidad and Tobago | **Completed 2025**
- NCC Education Level 4 Diploma in Computing / Computer Business** | School of Accounting and Management Studies (SAMS), Trinidad and Tobago | **Completed 2024**
- High School Diploma** | Cowen Hamilton Secondary School | **2017 - 2022**

RELEVANT COURSEWORK

Web Development, Dynamic Websites, Database Development and Design, Computer Networks, Computer Systems, Information Systems Analysis, Business IT Project, Artificial Intelligence, Image Processing, Cloud Computing, Professional Issues: Computing and Society, Security Management, Operations and Analytics.

CORE STRENGTHS

Technical Learning: Quick to learn new frameworks, tools, and workflows through coursework, independent projects, and practical problem solving.	Data Accuracy: Comfortable checking records, balancing figures, cleaning information, and maintaining structured reports.
Remote-Ready Work Habits: Organized, self-directed, documentation-focused, and able to communicate progress clearly when working on technical tasks.	Problem Solving: Able to break down requirements, test solutions, troubleshoot issues, and improve systems based on feedback.

CERTIFICATIONS

- Rise Virtual Employment Certificate - July 2025

TARGET REMOTE ROLES & RECRUITER KEYWORDS

Target Roles	Junior Full-Stack Developer, Junior Web Developer, IT Support Technician, Data Operations Assistant, AI Automation Assistant, Database Support Trainee
Search Keywords	Next.js, TypeScript, PHP, MySQL, PostgreSQL, Prisma, Python, SQL, REST APIs, GitHub, authentication, dashboards, CRUD, Excel reporting
Availability Value	Remote-friendly, fast learner, organized communicator, project-focused, comfortable documenting work and improving systems from feedback
