Dear Hiring Manager,

I am writing to express my interest in opportunities related to software development, AI automation, IT support, web development, data operations, and technical support roles within your organization.

I am currently completing a BSc (Hons) in Applied Computer Science through SAMS in partnership with Anglia Ruskin University. Through my coursework and personal projects, I have gained practical experience building full-stack web applications, database-driven systems, AI/ML workflows, and automation-focused tools using technologies such as Next.js, TypeScript, PostgreSQL, Prisma ORM, PHP, MySQL, Python, MATLAB, and Tailwind CSS.

One of my strongest projects is an AI-powered Job Match Assistant platform that I designed and deployed as a live full-stack application. The platform includes resume parsing, dashboard analytics, intelligent job ranking, remote-role filtering, application tracking, and integrations with public data sources. Working on this project strengthened my experience with full-stack architecture, database systems, UI/UX design, API integration, and deployment workflows.

I also completed machine learning and image processing coursework involving image classification, NLP/text classification, feature extraction, segmentation, and MATLAB-based computer vision analysis. These projects strengthened my analytical thinking, adaptability, and technical problem-solving skills.

Alongside technical work, I value reliability, professionalism, teamwork, and continuous improvement. I enjoy learning quickly, adapting to new technologies, and contributing to meaningful technical projects. I would greatly appreciate the opportunity to contribute to your team while continuing to grow as a developer and IT professional.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Rohan Rampersad
